**WWW** [Bold Profile](#)

A passionate and experienced Senior Software Engineer based in Bengaluru, India, with ~10 years of experience building impactful web and mobile applications for global businesses. I specialize in end-to-end backend engineering, cloud infrastructure, DevOps practices, and platform-level design.

My background spans full product life cycle delivery, from architectural design to CI/CD automation and scalable system implementation. I thrive on complex challenges and enjoy transforming technical debt into robust, maintainable solutions using modern frameworks and cloud technologies.

## Work History

2023-09 - Current

### Senior Engineer – Platform & Backend Systems

*Straumann Group, Bengaluru, India*

- Contribute as a Senior Engineer across backend development, platform engineering, data modeling, and cloud-native solutions, delivering scalable and reliable systems end-to-end.
- Take ownership of complex technical challenges and influence architecture and design decisions to improve performance, maintainability, and operational stability.
- Lead healthcare data workflows including extraction, transformation, migration, and regulated data handling to ensure compliance and business continuity.
- Design analytical data models and reporting structures to enable scalable dashboards and data-driven decision-making.
- Drive observability, monitoring, alerting, and incident analysis initiatives to improve system reliability and reduce operational risk.
- Collaborate cross-functionally to enhance CI/CD pipelines, streamline deployments, and strengthen overall platform stability.
- Mentor peers and promote production-ready engineering practices, improving technical quality and delivery standards.
- Partner across teams to drive collective outcomes and support continuous platform modernization through upgrades, security enhancements, and architectural improvements.

2021-10 - 2023-09

### Senior Software Engineer - Java & AWS Cloud

*Aritha Consulting, Bengaluru, India*

- Contributed as a Senior Software Engineer across backend development, multi-tenant architecture, and database design, building scalable and maintainable enterprise systems.

- Designed and implemented multi-tenant storage architecture with master-slave schema strategy to ensure data isolation, scalability, and performance optimization.
- Enabled team growth by mentoring engineers, driving technical discussions, and promoting root-cause analysis and long-term solution thinking.
- Strengthened CI/CD practices by collaborating with DevOps teams, establishing reliable deployment pipelines, and helping build a more automation-driven engineering culture.
- Improved overall engineering maturity through hands-on implementation, workflow optimization, and continuous knowledge sharing.

2021-04 - 2021-09

## **Software Engineer - PHP Framework Developer**

*Sigma Infosolution, Bengaluru, India (Remote)*

- Developing an automation process for the warehouse Inbound and Outbound process for products SKUs using PHP.

2020-11 - 2021-01

## **Software Engineer - PHP & Cloud Developer**

*KodeTiger, Siliguri, India (Remote)*

- Use of CodeIgniter framework to implement a tour and travel-based project. Usage of AWS Code Commit and AWS Elastic Beanstalk with CI/CD process.

2019-04 - 2020-09

## **Software Engineer - Team Lead**

*EPets, Pune, India (Remote)*

- Contributed in a fast-paced startup environment, delivering multiple digital products across pet services, logistics, and rental housing platforms.
- Partnered closely with founders and technical leadership to translate product ideas into scalable web and mobile solutions.
- Acted as an early technical lead, guiding a team of seven engineers across multiple product streams.
- Oversaw web and mobile development, driving architecture decisions and ensuring timely, quality-focused delivery.
- Balanced hands-on engineering with leadership responsibilities, mentoring team members and improving technical decision-making.
- Strengthened development workflows, scalability, and product reliability in a rapidly evolving startup environment.
- Built a strong ownership mindset and foundational technical leadership experience for future platform-scale responsibilities.

2018-06 - 2018-12

## **Software Engineer - Hybrid Mobile & PHP Framework**

*Raintit Solution, Mysore, India*

- Developed hybrid mobile applications using Ionic and Cordova for the LetsGo platform.
- Built server-side functionality using CodeIgniter and MySQL to support scalable backend operations.
- Integrated Google Maps APIs for real-time geolocation tracking and vehicle mapping features.ble.

2017-03 - 2018-05

## **System Engineer - Mobile and PHP Developer**

Technovation Software, Mysore, India

- Developed Android applications using Core PHP, Android SDK, and Android libraries, including food delivery and communication-based platforms.
- Integrated Google Maps APIs for geolocation, access point mapping, and station tracking functionalities.
- Implemented Firebase services for real-time data synchronization and backend support.
- Built survey-based applications using Core PHP, contributing to early-stage startup product initiatives.

## Education

2012-08 - 2016-05

### Bachelor of Engineering: Electronic And Communication

Maharaja Institute of Technology, Mysore - Mysore, India

## Personal Details

**Nationality:** Indian

**Marital Status:** Single

**Visa Status:** No VISA

**Gender:** Male

## Accomplishments

- **Best Employee Award – Straumann Bangalore Office:** Recognized for exceptional contributions to the growth of the Centre, demonstrating a proactive *Player and Learner* mindset. Successfully guided newcomers to better understand the product, fostering a collaborative and knowledge-sharing environment.

## Languages

Kannada

Bilingual or Proficient  
(C2)

English

Advanced (C1)

## Certifications

2017-02

Java, J2EE, Spring and Hibernate at JSpider Training Centre Bengaluru

2021-11

Spring Boot E-Commerce Ultimate Course

2021-12

Elasticsearch Masterclass with Logstash and Kibana

2022-09

Docker & Kubernetes: The Practical Guide

2023-10

Introduction to Terraform on Azure
